

Anterior  
Full Contour

**ORIGIN** *Beyond*<sup>TM</sup>  
A New Breed of Zirconia

Replace Lithium Disilicate With The  
Ideal Translucency and Strength of  
Our New Zirconia  
(680 mpa)

Easier Contact and Occlusal Adjustment  
than Conventional Zirconia

We've heard your demands for a more aesthetic zirconia based restorative choice. B&D Dental presents a new breed of zirconia - ORIGIN<sup>®</sup> Beyond<sup>™</sup>. A zirconia with such clarity that stump shades matter.

Once you've placed Beyond<sup>™</sup>, you'll never view zirconia the same way again.

**ORIGIN<sup>®</sup> Beyond<sup>™</sup>** is a new breed of zirconia. It's superior aesthetic qualities combined with greater optical clarity make it ideal for anterior full contour restorations. Its vibrant transparency will raise posterior aesthetics to new heights while offering 2x the strength of lithium disilicate crowns.

- Optimized microstructure provides higher translucency
- Significant flexural strength, in excess of 680 Mpa
- Indications include inlays, onlays, single restorations, both anterior and posterior, and up to 3 unit anterior bridges
- Full contour restorations or substructures for layering
- Significantly more translucent than traditional high translucency zirconia
